

# Planet

*The leading European variety of spring barley, with outstanding malting properties*

## Variety properties

- Medium early variety
- Optional brewing barley
- Outstanding yield potential
- A plant of medium growth
- Excellent tolerance to plant diseases
- Accepted varieties of malt and brewery

## Agro-technical characteristics

- Excellent resistance to lying down:
- Intensive drilling
- Sowing norm: 350 - 400 germinating grains / m<sup>2</sup>
- Sowing time:
  - in the autumn term, the last decade of October and the first decade of November,
  - in the spring term end of February and beginning of March
- Excellent stability

## Disease resistance

- Rhynchosporium: tolerant
- Leaf rust: moderately tolerant
- Powdery mildew: moderately tolerant
- Helminthosporium: moderately tolerant

## Malting properties

- Malt of excellent quality
- Low protein content
- Good calibration
