

ADJUVANT
FOR BETTER EFFECTIVENESS OF FUNGICIDES, INSECTIDES AND HERBICIDES

HURRICANE

On the basis of pine resin

**EXCELLENT
ADHERENCE TO ALL
CULTURES!**

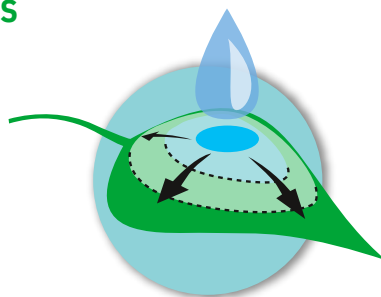

APPLICATION Fungicides, insecticides and herbicides. **All cultures.**

TECHNICAL CHARACTERISTICS

GLUE

HURRICANE guarantees precipitation resistance at an intensity of 20 to 30 mm. This property is a great advantage when growing crops in areas with increased rainfall as well as in cultivation where irrigation is used.

EXPANSION

HURRICANE reduces the surface tension of droplets (reduced from 60/70 dyn/cm to 32/35 dyn/cm). As a result, the surface coverage of the sheet is better.

RETENTION

HURRICANE prevents losses of plant protection products due to refusal or rinsing.

ADVANTAGES

Multifunctionality, verified plugin for fungicides, insecticides and herbicides :

- **Anti-rinsing**
- **Retention**
- **Long-term action**
- **Quality of treatment (better effect of drops)**

COMPATIBILITY

Always add HURRICANE last to the tank. It is recommended to dilute the preparation before pouring it into the container.

Wait until the wet dusty (WP) and wet granules (WG) are completely dissolved before adding HURRICAN.

Recommended dose: 0,05 L/hL

Dose : 0,1 L/ha (for the consumption of 200 L of sprinkling/ha)

COMPATIBILITY

HURRICANE nije kompatibilan s herbicidima na bazi dikvata (npr. Reglone Forte).
