Crop

ES Comandor

The ideal combination of early maturity, stability and high yield !

Variety characteristics

- Very early variety (Group 000)
- Cover crop with high yield potential
- The variety is sensitive to the active substance pendimethalin
- Plant height: low
- Hilum color: yellow
- Flower color: violet
- High pod shattering tolerance

Agro-technical characteristics

- Optimal sowing date: until mid-June in dry farming; until June 25 in irrigation conditions
- Recommended sowing density:
 - 70 -75 grains/m² in dry farming
 - 60 - 65 grains/m² in irrigation conditions

Quality characteristics

- Protein content: 40- 42 %
- Oil content: 19 - 21 %

Diseases tolerances

Phytophthora blight

Sclerotinia

Bacteriosis
