

# ES Pallador

*The variety with the highest yields in production!*

## Variety characteristics

- › Medium late variety (Group I)
- › A variety with high yield potential
- › Plant height: medium height
- › Hilum color: dark brown
- › Flower color: purple
- › Height of the first pod: up to 18 cm
- › High lateral branching potential
- › Spear-shaped leaf - exceptional tolerance to dry conditions

## Quality characteristics

- › Protein content: 39 - 41%
- › Oil content: 21 - 22%

## Agro-technical characteristics

- › Optimum sowing time: until April 20
- › Recommended sowing density:
- › - 45 - 50 grains/m<sup>2</sup> in dry tillage - 39 - 44 grains/m<sup>2</sup> in irrigated conditions
- › Recommended row spacing: 50 - 70 cm
- › Excellent plant vigor

## Disease resistance

### › White rot:

izrazito niska   niska   srednja   visoka   izrazito visoka

### › Bacteriosis:

izrazito niska   niska   srednja   visoka   izrazito visoka

### › Black Spot:

izrazito niska   niska   srednja   visoka   izrazito visoka
