

ES Tribor

Leader in production!

Variety characteristics

- › Early variety (Group 0)
- › High productivity variety
- › A semi-determinate variety
- › Plant height: low
- › Hilum color: dark brown
- › Flower color: purple
- › Height of the first floor of the pod: 12.9 cm
- › The mass of one thousand grains is about 212 g
- › The variety is moderately sensitive to the active substance pendimethalin

Quality characteristics

- › Protein content: 40 - 43 %
- › Oil content: 21 - 22%

Agro-technical characteristics

- › Optimum sowing time: until the end of April
- › Recommended sowing density:
 - › - 55 - 60 grains/m² in dry tillage
 - › - 44-50 grains/m² under irrigation conditions
- › Recommended row spacing: 25 - 50 cm
- › High tolerance to lodging
- › High tolerance to pod cracking

Disease resistance

› White rot:

izrazito niska	niska	srednja	visoka	izrazito visoka
----------------	-------	---------	--------	-----------------

› Bacteriosis:

izrazito niska	niska	srednja	visoka	izrazito visoka
----------------	-------	---------	--------	-----------------

› Viruses:

izrazito niska	niska	srednja	visoka	izrazito visoka
----------------	-------	---------	--------	-----------------
