

RGT Capitoll

Very early hybrid of short growing season!

Characteristics of hybrid

- › Very early hybrid, about 95 days of vegetation
- › High oleic sunflower
- › High-yielding hybrid
- › Head position: 45°
- › High tolerance to wilting
- › Total temperature: - from sprouting to flowering 770° - from sprouting to ripening 1540°

Agro-technological characteristics

- › Height: low (about 133cm)
- › High tolerance to lodging
- › Optimum assembly in harvest: 65,000 plants/ha
- › Optimum sowing time: until the end of July

Otpornost na bolesti

- › *Mildee*
- › *Sclerotonia head*
- › *Phomopsis stem*
- › *Phoma*

Karakteristike kvalitete

- › Mass of 1,000 grains: medium
- › Oil content: 46 - 47 %
- › Oleic acid content: 86 - 87 %
