

Tristan

A high-yielding variety with exceptional adaptability to different conditions of production!

Variety characteristic

- › Medium late variety
- › Two-row winter malting barley
- › High yield potential > 10 t/ha
- › A plant of medium growth, firm and elastic stems
- › Coarse and uniform grain

Agro-technical characteristics

- › Resistance to lodging: tolerant
- › Sowing rate: 350 - 375 germinating grains/m²
- › Optimum sowing time: October 5 - 20

Disease resistance

- › Gray spotting
- › Leaf rust
- › Reticulate spotting
- › Mosaic virus

Malting characteristics

- › High extract content
- › Very good cytolytic and proteolytic indicators of malt breakdown
